EXPERIENCE

Arc XP — Product Designer 2

September 2022 - Present

Arc XP is a B2B SaaS content management system owned and distributed by *The Washington Post*. The platform empowers publishers, news media, and broadcasters to delivery high-quality content and experiences to millions of readers and viewers worldwide.

- Owned end-to-end delivery of redesigned video editing experience, from initial user research to prototype design to engineering handoff and design QA
 - Utilized Datadog session tracking and click data from 10+ customers and hundreds of users to scope beta release of key workflows in redesigned experience
 - Accelerated content lifecycle by reducing video publish turnaround by over 50%
 - Translated user insights from user testing sessions across 10+ customer organizations into design impactful experiences to improve efficiency and quality of video content
 - Successfully created a new product to expand asset management offering to include audio content, allowing newsrooms to combat reader churn and boost retention
 - Crafted complex components that accommodated use cases from 10+ products to expand design system used by fellow designers and facilitated developer implementation
 - Collaborated with product managers, engineers, and stakeholders to define product requirements and design solutions
-

EDUCATION

Carnegie Mellon University

2022

BS. Information Systems and Human Computer Interaction

- Heavy design and UX research coursework with two capstone projects delivering full software and design solutions to local nonprofit organization and education-tech startup
